PROFILE

Android developer and software engineer with professional Android experience since 2021, building and maintaining production apps at My Taxi Ride. Works in Kotlin and Jetpack Compose, structured around MVVM and Clean Architecture, and builds web platforms with Next.js, React and TypeScript. Independently designs, builds and releases products end to end: WA Toolbox on Google Play and Kalyvor on the web.

EXPERIENCE

Senior Android Developer · My Taxi Ride (MTR)

February 2021 – Present

Building and maintaining multiple production Android applications across My Taxi Ride's transportation and dispatch software ecosystem.

- Develop, ship and maintain features across several Android apps in Kotlin, Java and Jetpack Compose.
- Design and implement app architecture using MVVM and Clean Architecture to keep code testable and easy to change.
- Integrate REST APIs and backend services that connect the apps to the wider dispatch platform.
- Diagnose and resolve performance issues and production bugs through profiling and debugging.

Stack: Kotlin, Android SDK, Java, Jetpack Compose, MVVM, Clean Architecture

PRODUCTS

WA Toolbox · Android app

Published on Google Play

Design, development and Google Play release

All-in-one Android utility app for messaging: direct chat without saving numbers, status saver, QR code tools, text repeater, fancy text, saved messages and a cleaner, in one lightweight app.

Stack: Kotlin, Android SDK, AdMob · Google Play

Kalyvor · Productivity web platform

Live

Product, design and web development

Tools-first platform bringing online tools for PDFs, images, documents, developers and everyday calculations into one searchable place. No account or setup; every tool shares one design language.

Stack: Next.js, TypeScript, Tailwind CSS · kalyvor.com

InvoiceFlow · Android app

In development

Product design and Android development

Invoice, estimate and receipt management app for freelancers and small businesses.

Stack: Kotlin, Jetpack Compose

SKILLS
